

Announcement:

Auditdata receives NHS approval for N3 connection

 **AuditBase System**

Connecting for Health

N3

NHS approval for N3 access given on 24-07-2009

Auditdata who develops and supports office management software for hearing care professionals across the UK is celebrating being given a formal seal of approval from the NHS this week. Auditdata has successfully completed the NHS IGSoc (Information Governance Statement of Compliance) process which is administered by NHS Connecting for Health.

The IGSoc commits an organisation to implement an Information Security Management System to ensure that the organisation complies with legal requirements, primarily the Data Protection Act, and complies with requirements of the NHS to safeguard the confidentiality of patient identifiable data. In return, the organisation can connect to NHS digital services via N3. Companies that receive approval go through a rigorous process and supply full supporting documentation.

What we do

Auditdata develops and provides the system AuditBase. The base version of Auditdata's office management system (OMS) is designed specifically for hearing care professionals. Including the versatile modules of client administration, scheduling, journal, stock management and audiometry, AuditBase System is the preferred software solution to more than 4,000 daily users in the UK and Scandinavia.

Comments from the CEO

"We were delighted to be awarded the IGSoc," Claus Bak Petersen comments, CEO of Auditdata. "The company will now have access to N3 connections, so we can support AuditBase through a direct broadband connection to the NHS. This means that we will be able to further improve the service we offer our customers in hearing clinics internationally."

The accreditation is renewed annually and enables Auditdata to supply the whole public sector. "We have long been market leaders in supplying hearing care office management systems to the public sector," Claus Bak Petersen comments. "This accreditation further strengthens our position as a trusted NHS supplier of choice."

Best Regards

Steen Schledermann
Director of QA and Customer Support
