1 Introduction

The purpose of this document is to provide an overview of all the new and modified features within the Aurora release version 6.19.

If your clinic has received custom development work, the changes outlined in this document may or may not be exactly as described. If you have any questions regarding the changes outlined in this document, please reach out to an Auditdata Customer Service Representative.

2 Kleber Address Validation Tool Now Available for the UK

Our Kleber Address Validation Tool integration is now available for our UK clinics, joining our Australian, New Zealand and Canadian clinics that already use the tool.

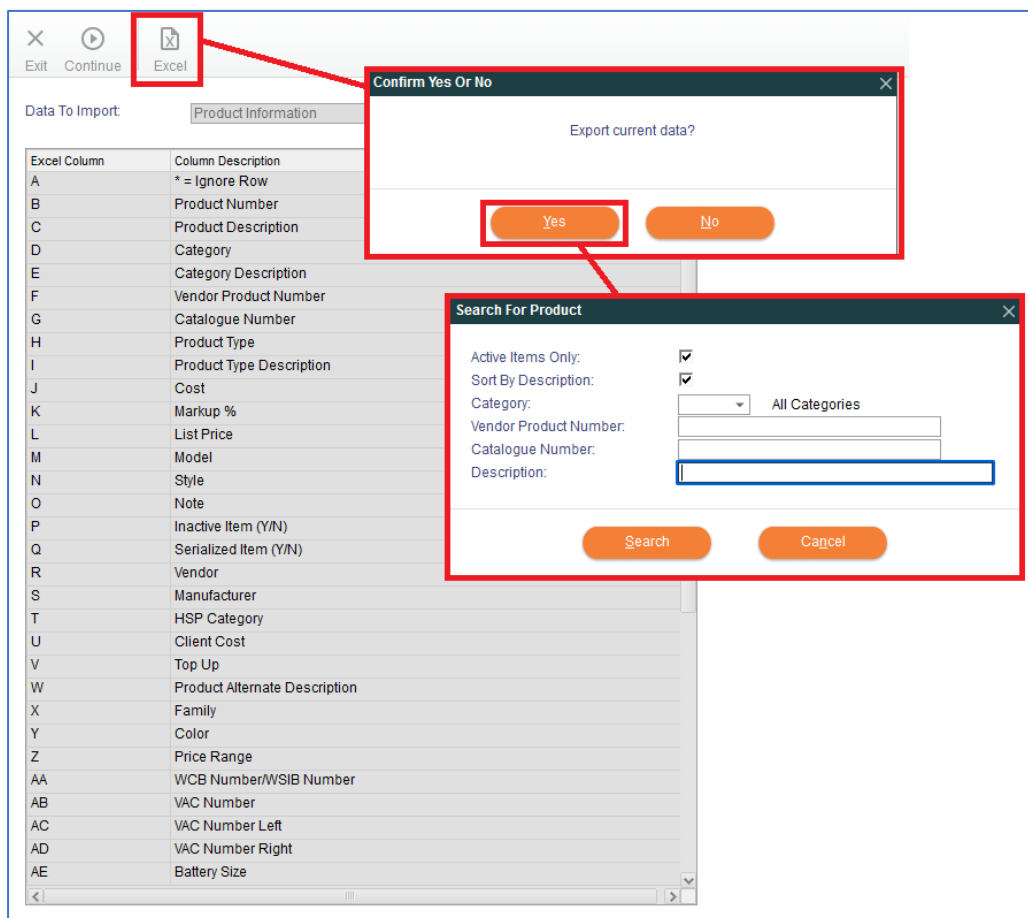

The Kleber Address Validation Tool is a subscription-based third-party integration that allows clinics to ensure that patient addresses entering the database are correct, consistent, and valid postal addresses.

The screenshot displays the Kleber Address Validation Tool interface. The main form contains patient details such as Patient Number, Title, First Name, Last Name, Short Name, Address, City, Prov/State, Postal/Zip, Date Of Birth, Health Card Number, Primary Funding Source, Secondary Funding Source, Last Fitting Date, Replacement Date, Specialist Name, Physician Number, ENT Number, Campaign, and Note. A red box highlights the Address field, which contains "112 Mechanic St". A "Search Results" popup window is open, showing a list of suggested addresses. The first result is "112 Mechanic St Drumbo, ON, N0J 1G0". The popup also includes "Select" and "Cancel" buttons.

When a user is finished entering part of an address, they will be presented with a list of perfectly formatted postal addresses that the user can select from.

3 New Data Import Enhancement

Within UTILITIES > IMPORT DATA the PRODUCT INFORMATION, COST LEVELS, PRICE LISTS and PRODUCT MIN/MAX QUANTITIES have been enhanced to allow users the option to export current data.

Users who choose to export data may be presented with other filter selection options regarding the data they wish to export.

It is important to note that users who have permission to the IMPORT DATA function will now also have permissions to export data.

4 Quote “View Only” Screen Enhancement

In the spirit of aligning viewable invoice and accounting details within Invoices and Quotes, the QUOTE DEPOSITS view-only screen has been enhanced to show accounting transaction batch details.

The screenshot shows the Aurora 6.19 software interface. The main window is titled "Quote Deposits" and contains a table with the following columns: Seq, Date, Ret#, Method, Amount, and Exported. The table has one row with the following data: Seq: 0001, Date: 09/05/2022, Ret#: 00000839, Method: Cash, Amount: 500.00, and Exported: [checked]. Below the table, there are buttons: Add, Change, Exp/Con, Continue, and Cancel. A red box highlights the "Exp/Con" button. A red arrow points from the "Exp/Con" button to the "Navision Cash Trx Number" field in the table.

Seq	Date	Ret#	Method	Amount	Exported
0001	09/05/2022	00000839	Cash	500.00	[checked]

Clicking the EXP/CON button within the QUOTE DEPOSITS window will now display the Daily Close Cash Transaction number associated with each deposit.

5 New Sortable Screen within MANUAL NHAX RECONCILIATION

The MANUAL NHAX RECONCILIATION screen has been enhanced to allow the data presented to be sortable by the column headers. This is very helpful for those clinics importing a high volume of patient NHAX data into Manage.

6 Australian HSP Forms Updated

As per the July 2022 Australian HSP changes, the Maintenance Agreement and Device Quote form templates have been updated accordingly.

7 Previous Customer Deposits Now Viewable During Credit Invoice/Refund Process

When returning an invoice, users can now view the original invoice deposits as part of the viewable information. This is helpful in assisting the user determine how to refund the payments due in the case when the refund must match the payment type originally used.

Users can click on the ellipses to the right of the DEPOSIT AMOUNT on the CREDIT INVOICE and navigate to ORIGINAL PAYMENTS to see a list of deposits made and the details of those deposits.
