

Auditdata Engage

Build your pipeline the most effective way

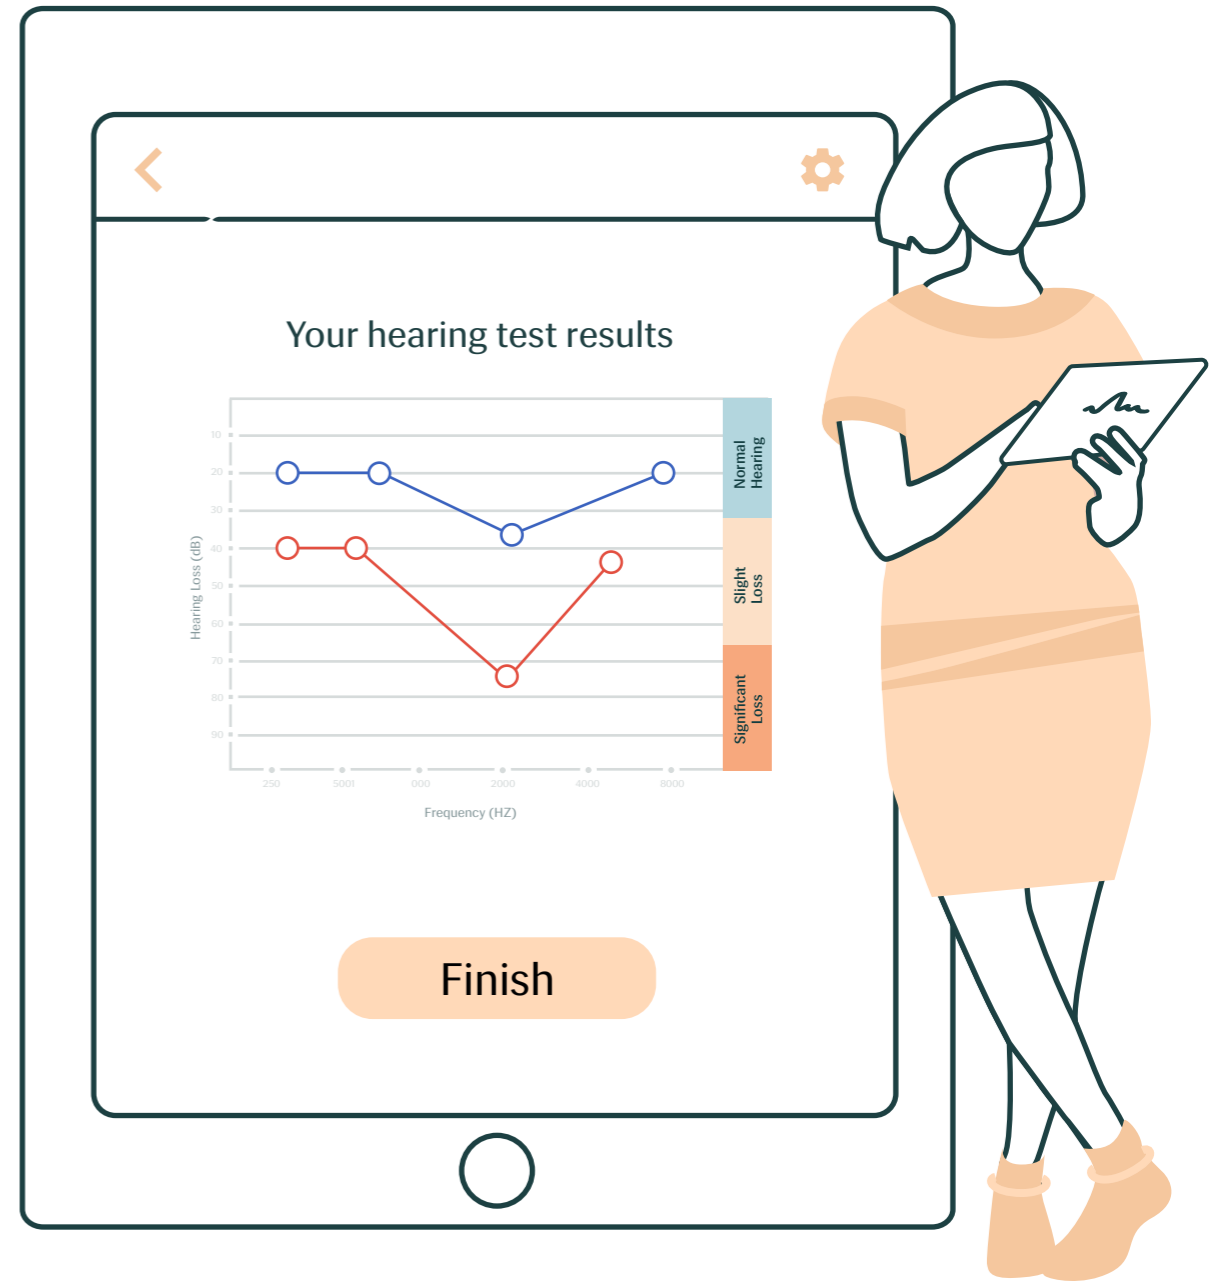

A simple tablet based hearing screening solution for retail locations. Lets hearing care providers engage with potential customers and generate valuable leads with less staff effort and cost.

Auditdata

More leads, less work and **more sales**

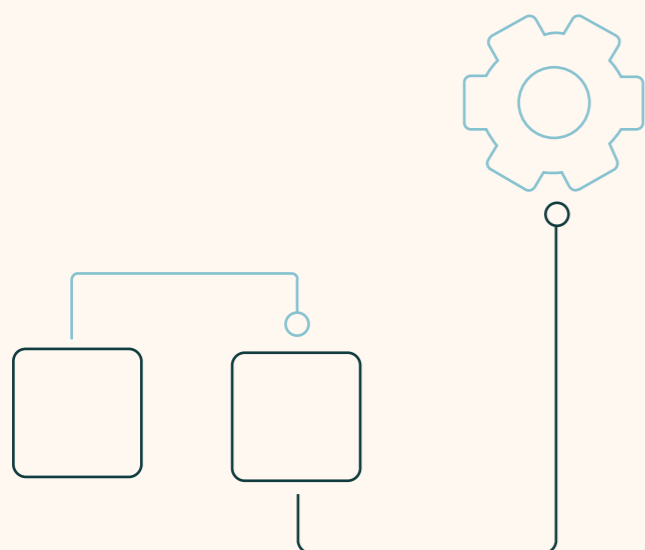

Auditdata Engage is simple to set up and use, eliminating the need for expensive lead sourcing. We provide centralized control enabling audiologists to collect and manage customer data while staying fully compliant with GDPR and other data security requirements. This translates into more leads, less work for your staff, and more sales for your business.

Have confidence when you engage **potential customers**

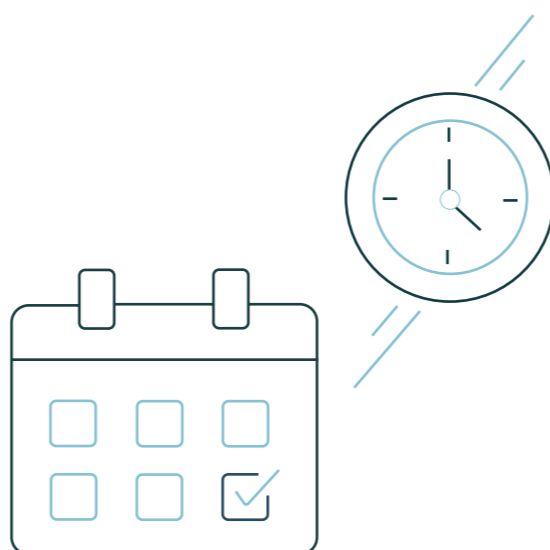

Customizable screening flow and company branding

Flexibility to create the user experience and messaging that fits your business.

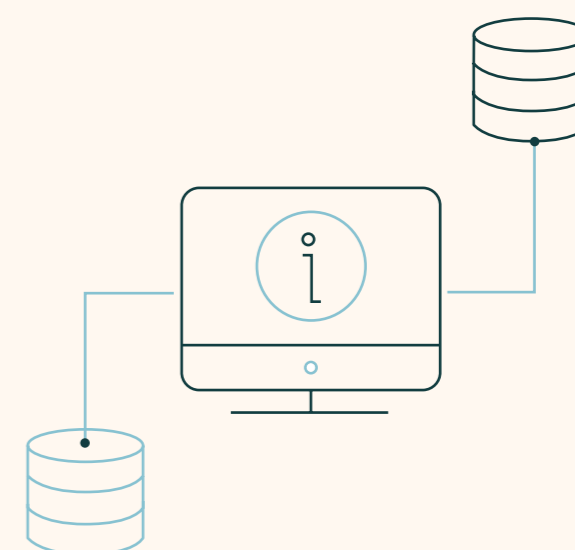

Make qualified leads actionable immediately

With integrated appointment scheduling, customers can schedule appointments on their own and your staff can take instant action.

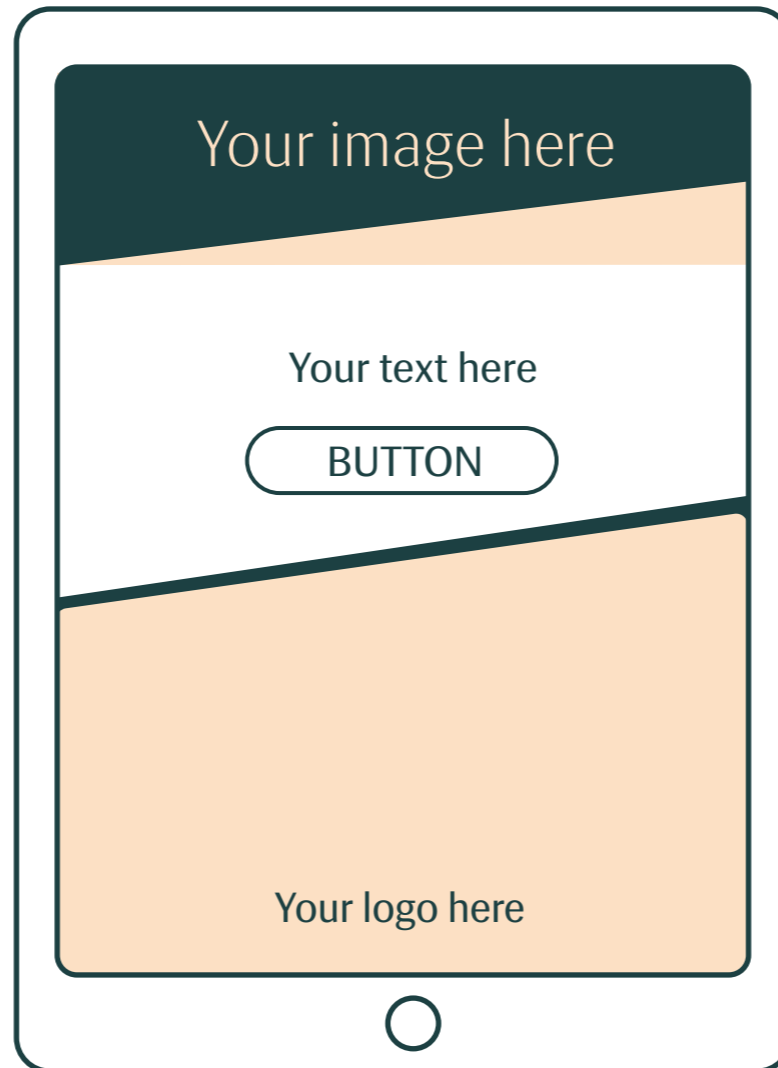

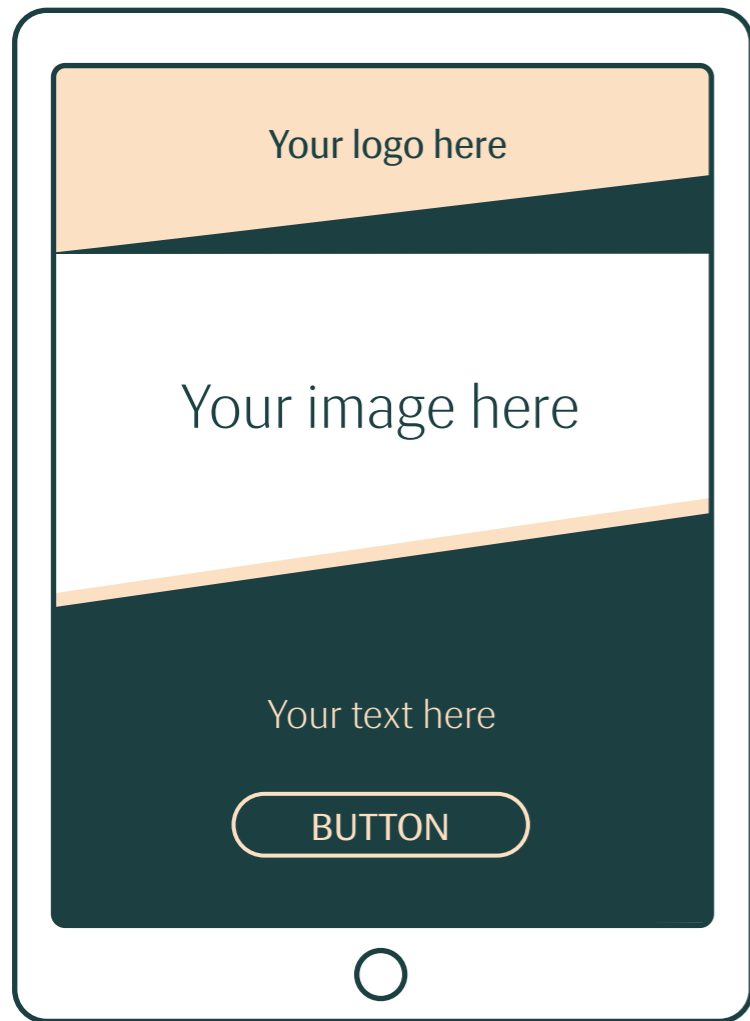

Seamless access to screener data

Working off-line or online, integration with the Auditdata OMS (Auditdata Manage) makes it possible to push screener results and patient data directly to the OMS with no double-entry.

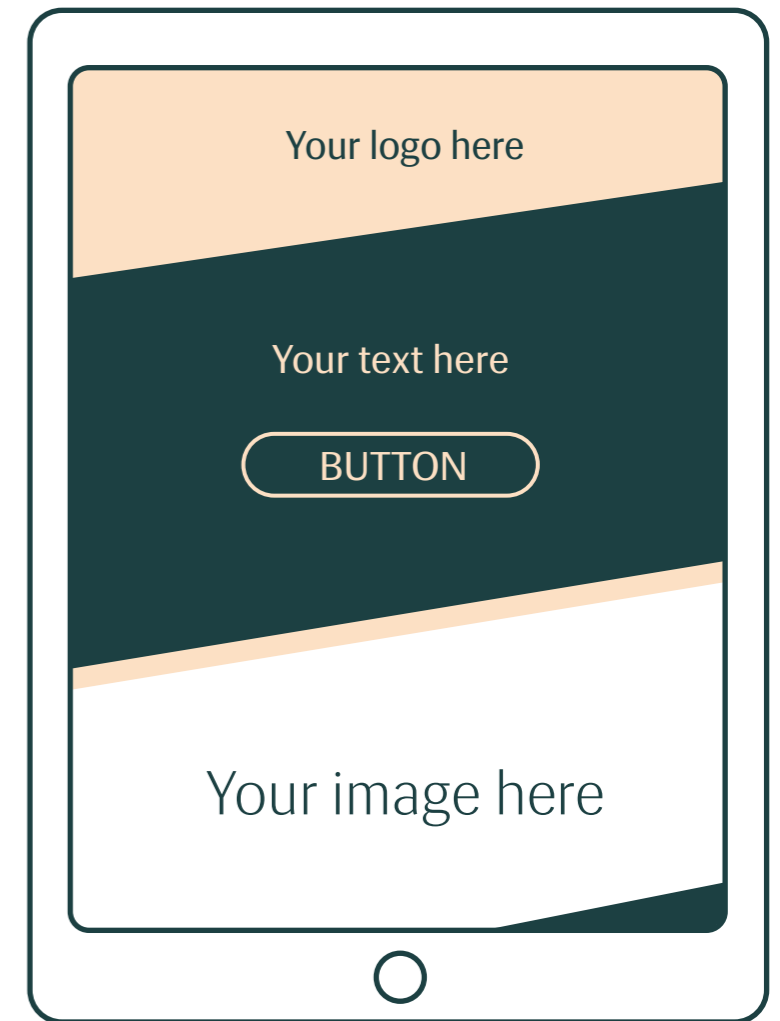

Reinforce your **brand identity**

Standing out in a crowded marketplace isn't easy.

Our customizable interface can be tailored to your brand, allowing you to make a lasting impression for your customers.

Unbeatable functionality

Fast hearing screening

Takes only two minutes and can be used across multiple locations

Intuitive and easy to use

Simple user interface with assistive video content

Customer test results via email

Customer will receive screening results upon completion

Background noise compensation

Environmental noise levels drives testing reliability

Customization

Support non-audiology headsets

iPads are calibrated to operate with selected headsets

Add instructional video to your test

Guide your customer with instructional videos

Configure multiple testflows

Test flows and result calculation is easy to configure and deploy

Reinforce your brand identity

Messaging and brand experience can be tailored to meet your specific needs

Configuration

Seamless integration to Auditdata OMS

Screener results and patient data are pushed directly to the OMS

Provided as SaaS and always up-to-date

Continuously updated and available

Synchronized with cloud

All screener data is hosted and backed up in the cloud

The Auditdata experience

More than just great technology

We know that great technology is only part of the solution. You need services that ensure your success, like rapid onboarding, implementation and perpetual support that goes far beyond what's expected.

That is the Auditdata experience and our promise to you.

Comprehensive worldwide support

We are a global organisation offering comprehensive worldwide support, professional services and training to all our customers. Immediate support via phone, email and live chat, 9-5 CET, M-F.

Easy onboarding

Optimize your onboarding process of staff with an incredibly easy and user-friendly deployment – it really can't be much easier!

Fully scalable

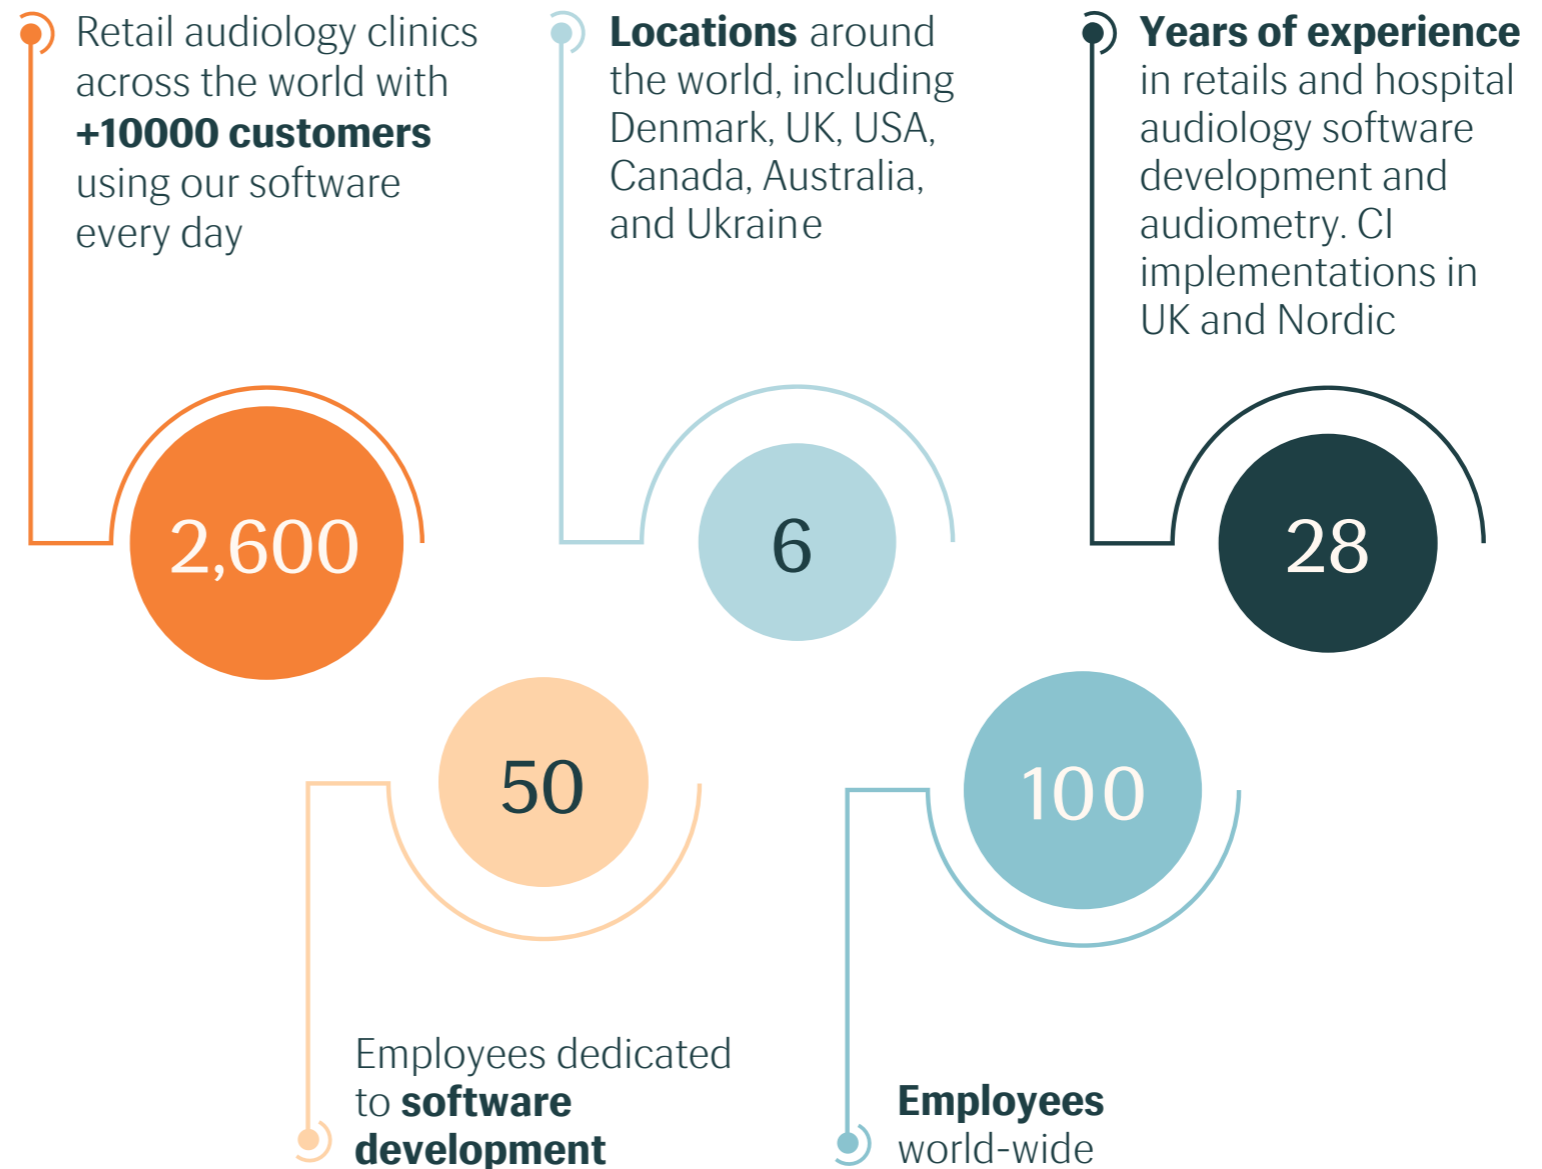

Implement to locally, administer centrally and maintain tight control over your entire business – even while it grows.

- Global Scalability
- Rapid Deployment
- Minimal IT Maintenance
- Data Protection and Compliance (ISO 27001:2013 Certification)

Auditdata by the **numbers**

Auditdata provides software solutions and services tailored to hearing care providers.

Based on data-driven insight, we help you connect and understand critical aspects of your customer journey and operational performance allowing you to improve both customer care and your bottom line.

What **customers** are saying

“Auditdata Engage has been a great new way for us to generate leads. During a short period of time we have performed hundreds of screenings and this has turned into valuable appointments”
